Dr. Sheldon C. Sommers  
Scientific Director  
The Council for Tobacco Research-USA, Inc.  
900 Third Avenue  
New York, NY 10022

Dear Dr. Sommers:

Thank you for the copy of the 1985 Report of the Council for Tobacco Research-USA, Inc. I noticed that a number of notable scientists in the oxygen free radical field and in chemical carcinogenesis are receiving research support from you, and I am interested in inquiring about support from you since my research fits into these areas. I am working on the effects of reactive aldehydes, such as acrolein (a cigarette smoke component), on lung macrophages and neutrophils and also on the mechanism of tumor promotion in mouse skin. I would appreciate if you could send me your guidelines for submission of proposals, and any other information which might be helpful to me with respect to submitting a proposal.

Thank you.

Yours sincerely,

*Gisela Witz*
